

Been searching, like really really searching
I wanna be greater but the person in me stuck with what I've learned and
Angry so angry with the money I keep earning
Never let myself stop me from doing what I am deserving
Hungry but my plates full
Buildin to the top floor
Momma knows I'm grateful
Dad is in the front row
Universe I'm thankful
Catching every angle
Doing this so graceful
When I speak a mouthful

Shine a light on my good side
Showing love in the night time
With the wind so cold
Put your fire out
And your miserable
Well the day will come
Take the match and rise from the ashes
Shine a light on my good side
Showing love in the night time
With the wind so cold
Put your fire out
And your miserable
Well the day will come
Take the match and rise from the ashes

I made a big mess
Do it every day
Step into my shoes, since you always be saying same
Not discounting you I just want you to hear the truth
Cause not all of us staying happy or feel the same pain as you
Let's talk about the future
I gotta a big house and husky with a german shepherd,
Gotta Tesla, and an escalade they say it's suits you
I travel to and from the countries like in Argentina,
I'm selling out arenas

Why is the wind so cold
Why is the wind so cold
Well the day will come
Well the day will come

Shine a light on my good side
Showing love in the night time
With the wind so cold
Put your fire out
And your miserable
Well the day will come
Take the match and rise from the ashes
Shine a light on my good side
Showing love in the night time
With the wind so cold
Put your fire out
And your miserable
Well the day will come
Take the match and rise from the ashes
