

Losing

Ain't a thing that's on my mind it's a

Nuisance

They gonna love me when I die but I'm rulin

Got a kingdom in the sky and I'm two steps, 20 laps, pass them I do 40 sets

I've been rising up and they could never take me down

Situations that I'm faced with always buried in the sound

I've been running with the torch and for years they burned it out

Now it's 12345 I'm countin years I took the crown

I'm sittin in that number one spot at the top with a diamond

Shoot my shot now they always wanna riot

I can hear them begging but I'm missing how they're crying

Didn't want me then but now you want me with the buy in

So much potential oh how I've been so forgetful of that inside is a missile

I've been avoiding the pistol we goin

Back and forth

Back and forth

Victory on a pedestal

Best sit down when I'm talkin

Or you're leavin with the medical

Going back and forth

Back and forth

Victory in the second dose

See the moment I'm ready

You'll never know what you're living for

Yeah they really like the heat

Man I feel like Chocobeast

Hear them singing in the streets

Yeah they playin with a king

Man I feel like Chocobeast

Hear them singing in the streets

I don't really see another plan

Yeah they ask me how I'm doing and I tell them who I am like

Yeah they really like the heat

Man I feel like Chocobeast

Hear them singing in the streets

Watch them

Watching

Wonder how I do it

Catch em stalkin

Flocking in a moment with my music

And I see what they say about me

And it's stupid

Another headline inside the minds of peoples views

I got that automatic start

Gonna hit em with a real expensive car

And I'm binging all the money flowin in my pockets
Ain't no stoppin the dream has been locked in
A whole different person than when you had met me
She said she never could ever just get me
I said I know cause I'm bigger than this thing
Don't understand how you think it's confusing baby

Back and forth
Back and forth
Victory on a pedestal
Best sit down when I'm talkin
Or you're leavin with the medical
Going back and forth
Back and forth
Victory in the second dose
See the moment I'm ready
